

PRECISE DIMENSIONAL ACCURACY & CONSISTENCY

Advanced CCD diameter measuring to guarantee the best dimensional accuracy and consistency.

*PLA filaments of 1.75 mm diameter,
Accuracy +/- 0.02 mm;
1 kg spool (2.2lbs)*

1.75±0.02mm

MADE MAINLY OF CORN STARCH

PLA is a biological material, extracted and purified from corn grain, eco-friendly, odorless, and harmless to human.

Less Stringing

Less Warping

Bubble-Free

High Purity Material

EXCELLENT OPTION FOR USERS WITH VARIOUS 3D PRINTING NEEDS

50-65°C
(122°F~ 149°F)

Build Platform(Optional)

200-230°C
(392°F~ 446°F)

Extrusion Temperature
